

Emergency Fact Sheet

Pullout Tab Card

FRONT

I have been diagnosed with **neuromyelitis optica spectrum disorder (NMOSD)** and may be having a relapse, which requires urgent care.

NMOSD is a relapsing autoimmune disease that primarily affects the optic nerve and spinal cord.

NMOSD attacks* can lead to **irreversible damage.**

I may also be, or have been, on therapy that increases the risk of infection. See the Patient Safety Card or call 888-765-4747.

*In describing NMOSD, the words "attack" and "relapse" have been used interchangeably throughout this piece.
